Agricultural Resources

Farm Stress & Suicide Prevention

We offer programs to provide financial assistance to farmers related to conservation, disaster assistance, price support, farm loans, energy programs. The Farm Service Agency (FSA) has emergency assistance programs to provide financial help when disasters strike. Timely reporting of damage and loss is essential for program participation. Additionally, some of those programs require a disaster designation to trigger eligibility. Agricultural producers can play a vital role in the disaster designation process. Please report crop and livestock losses and damage to agricultural land or structures to your Farm Service Agency at the County Level.

Spokane County - 99212 924-7350 x 2
8815 E Mission, Ste B, Spokane Valley

FSA offers several assistance programs to qualified agricultural producers who have losses due to wildfire:
- Emergency Assistance to Livestock, Honeybees and Farm Raised Fish (ELAP). This program covers additional feed purchases, water hauling, and additional grazing. This is for replacement items. It also allows for the assistance to go both directions. Take the feed and water to the animal or take the animal to new feed and water locations.
- Livestock Forage Program (LFP). This program covers grazing losses. This is for immediate items. This program does not need to be a part of the disaster, wildfire or any declaration.
- Livestock Indemnity Program (LIP). This program covers livestock losses in excess of normal mortality. This program does not need to be a part of the disaster, wildfire or any declaration.

Items available but require national approval for funding:
- Emergency Conservation Program (ECP). This covers items such as lost felling.
- Emergency Haying and Grazing of CRP. This would be allowed once the county reaches a D2 drought designation, or if the county has at least a 40% loss in forage production from a qualifying event, such as wildfire.
